PROVISIONAL BALLOT PROCESSING SYSTEM

Maricopa County Elections Department
 Pew GeekNet MN
 July 14th, 2012

Maricopa County Profile

- 1,869,666 Active Voters (2,094,176 with Inactives)
 - 38% Republican
 - 34% Party Not Designated
 - 28% Democrat
 - (Less than 1% Green & Libertarian)

- Voting Rights Act Coverage:

- Section 203: Spanish & Tohono O'odham
- Section 4f4: Spanish
- Section 5 Preclearance

- Conduct elections for all jurisdictions with exception of the City of Phoenix.

- Blended system of optical scan & DREs

- >1/2 Voters on Permanent Early Voting

WHY SO MANY IN AZ??

➤ Volume of provisional ballots has been called the “canary in the coalmine” – but what is being signaled?

- Administrative issues?
- Lack of list maintenance?
- Insufficient or inconvenient registration methods?
- Definition of what is a “provisional”?
- Or, just maybe, human nature to procrastinate &/or not read instructions?

BACKGROUND TO PROVISIONAL BALLOTS

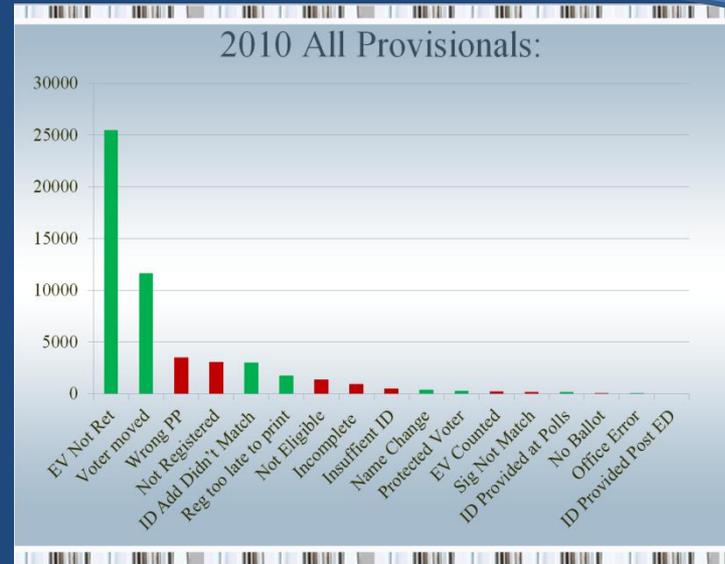

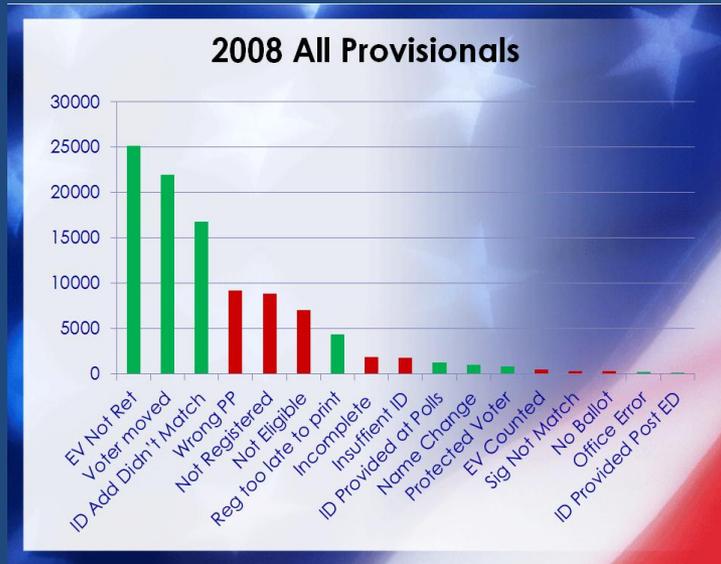

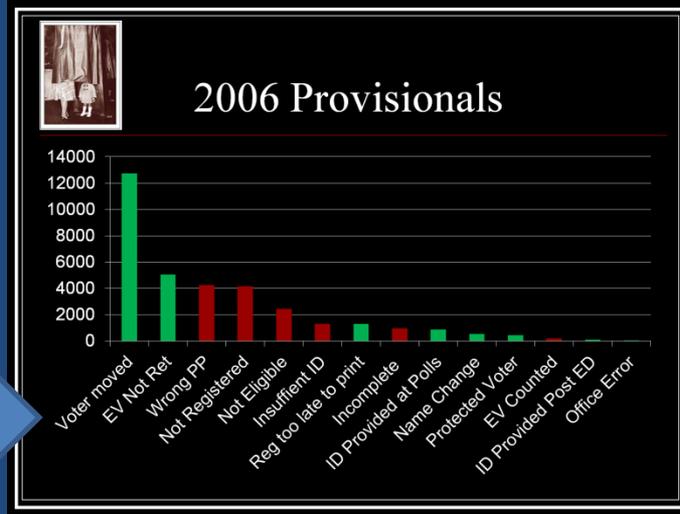

- In Arizona we have had a form of provisional voting for years—going back to before we were a state.
- Previously called “Ballots To Be Verified” and “Question Ballots”, voters whose name did not appear in the Signature Roster were still able to cast their vote and have it count after it was determined that they were eligible.
- Historically the most common reason this occurs is due to voters not maintaining a current voter registration when they move.

CHANGES IN TRENDS

- With the implementation of a Permanent Early Voting List (PEVL) we have seen a shift in Provisional voting.
- Previously on average 1% of the voters who had requested an early ballot went to the polls and voted a provisional.
- After PEVL, that has tripled to 3% (in some cases quadrupling the actual number).
- With more than 1 million on the PEVL that means volume...

GENERAL ELECTION COMPARISON

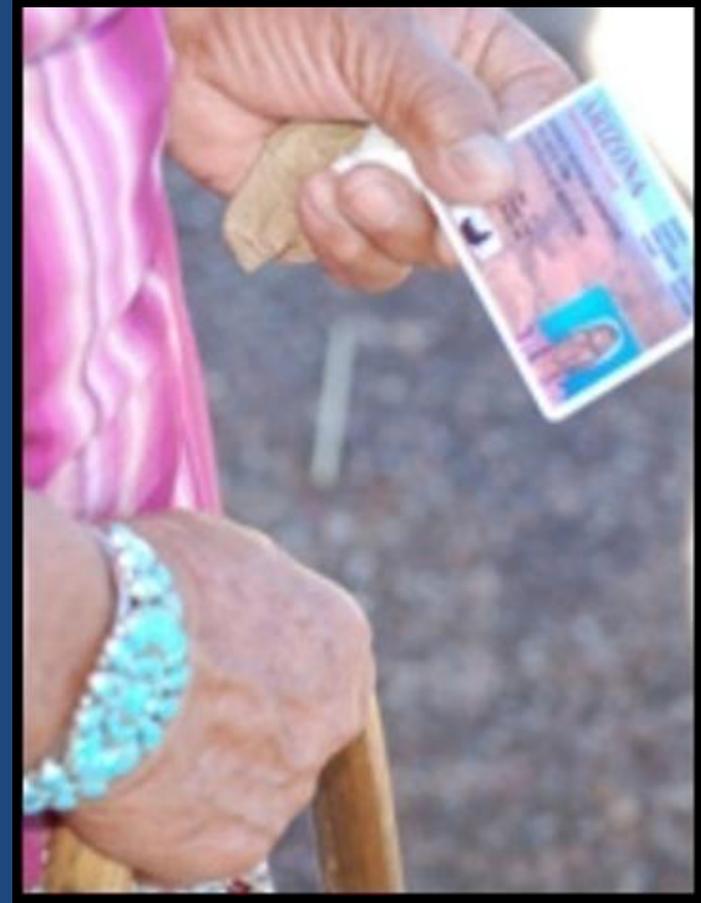

And volume means a need to innovate, automate, and “technologize”!

Setting the Stage

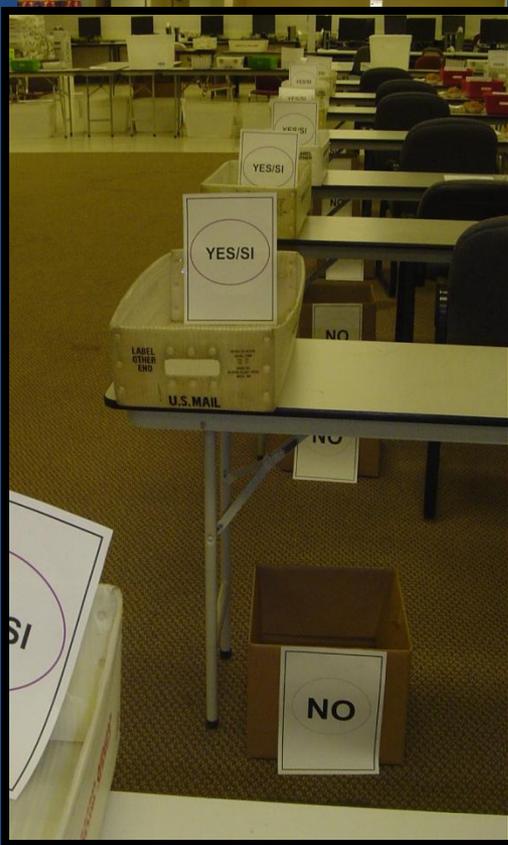

STEP ONE: MANUAL PROCESSING

CONDITIONAL PROVISIONALS: ID YES & NO

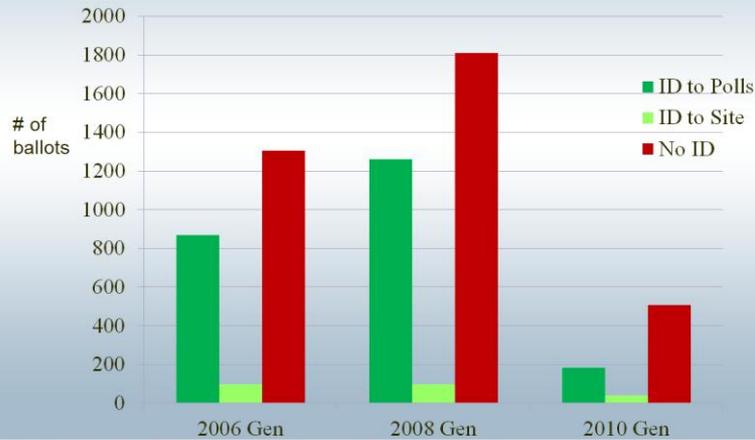

- Provisionals are all hand-sorted to isolate those which are waiting for the voter to return with valid ID so that their ballot can be processed...
- Voter initiative from 2004.

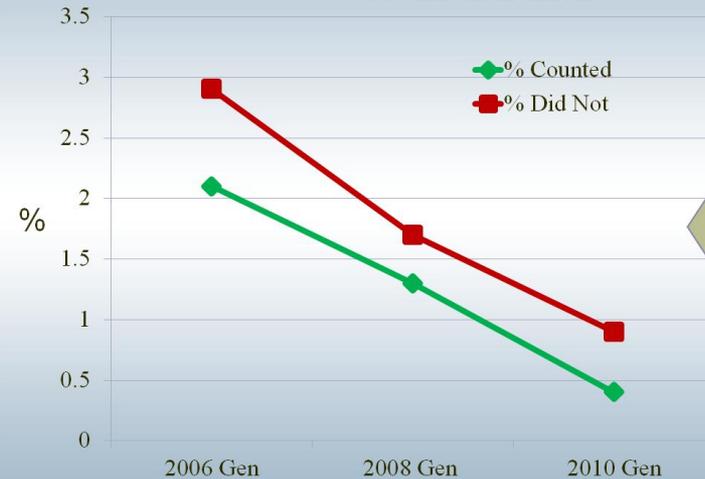

I include this for those states who are implementing similar legislation as a possible harbinger (that canary again) of what may come!

CONDITIONAL PROVISIONALS

of Conditional Provisionals & Their Disposition For Comparison:

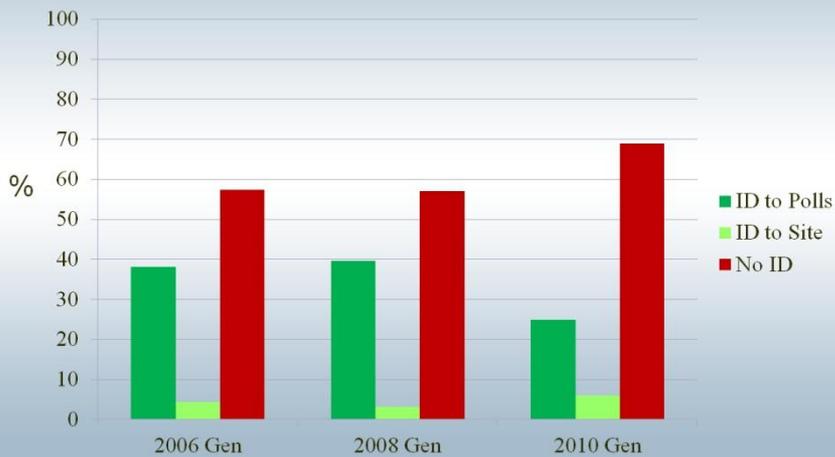

% of Provisionals Which Were Conditional

The good news is that conditional provisionals is shrinking in percentage of the total provisional group.

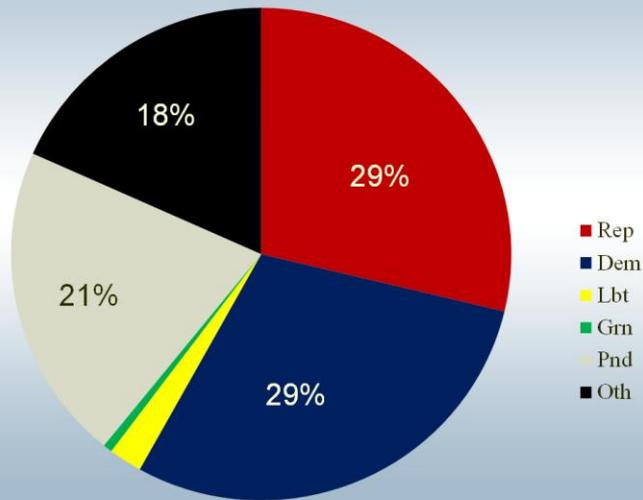

The bad news is that the number of voters returning is still eclipsed by those who do not return with their ID.

Conditional Provisionals & Their Disposition % For Comparison:

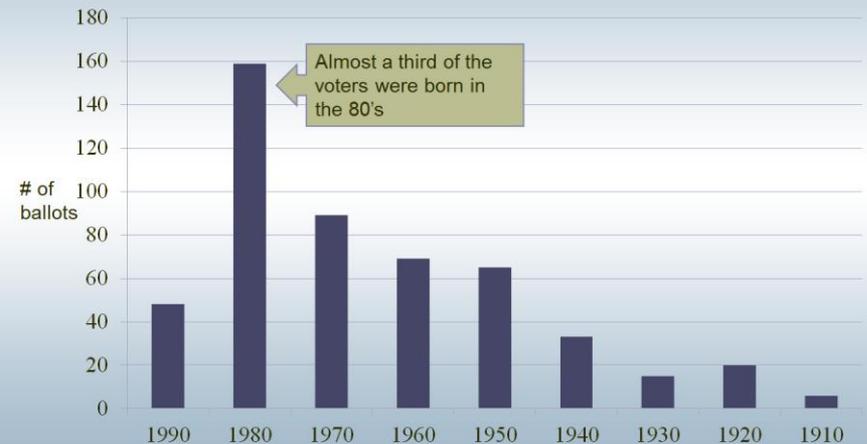

2010 GENERAL

Who were these voters?
Did not return with ID

Who were these voters?
Did not provide sufficient ID:

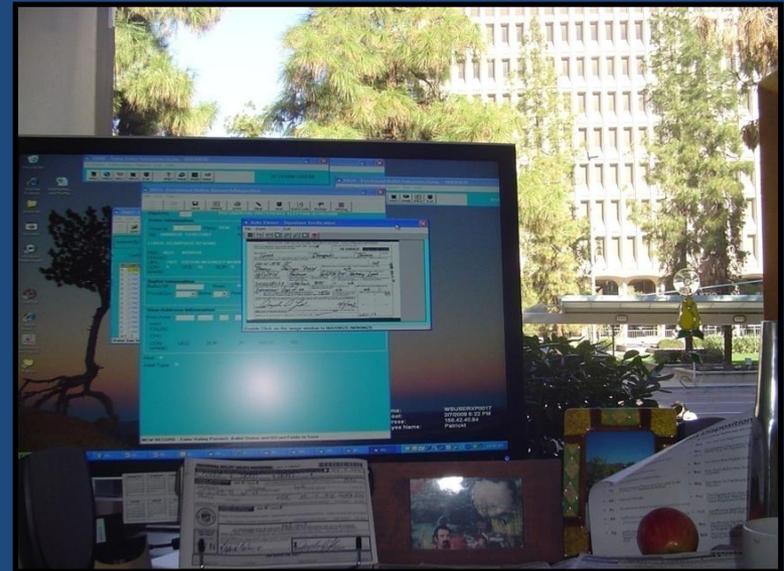

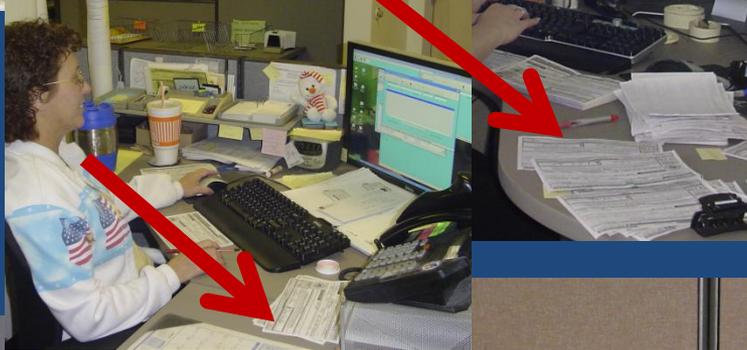

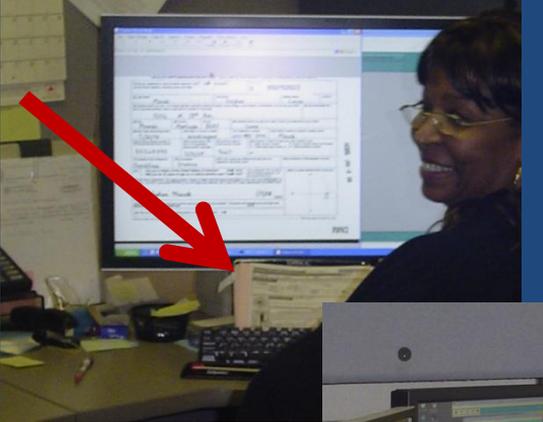

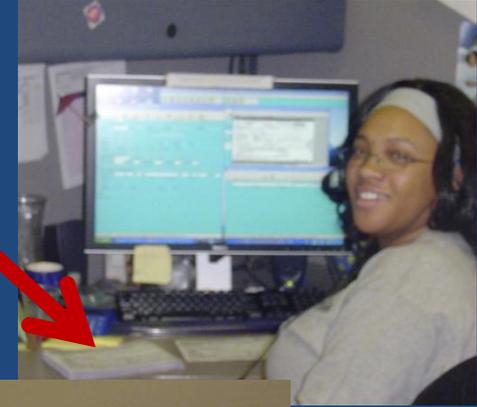

**ORIGINALLY ALL THE
PROVISIONALS WERE
DISTRIBUTED AS A PACKET
WITH THE FORM ATTACHED
AND THE BALLOT INSIDE:**

**THIS WAS IMPROVED SO THAT ALL
BALLOT ENVELOPES STAYED IN A
SINGLE LOCATION AND A COPY OF
THE FORM REMOVED FOR
PROCESSING.
THESE COPIES WERE PUT IN
PRECINCT ENVELOPES WHICH WERE
THEN CHECKED OUT AND
RESEARCHED:**

THEN THE FORMS WERE DISTRIBUTED THROUGHOUT OUR THREE OFFICES:

THE PHYSICAL DISTRIBUTION OF TENS OF THOUSANDS OF FORMS HOWEVER, STILL PROVIDES TOO MUCH OPPORTUNITY FOR MISPLACEMENT OR INEFFICIENCY.

- There was always the safeguard of the envelope with the back-up form still attached.

PROVISIONAL FORMS AFTER RESEARCHING THE BALLOT'S DISPOSITION:

CHANGES IN 2012

➤ We implemented a program where all the forms are scanned and then the image is processed by staff.

➤ All changes to voter registration are done simultaneously—no second keying of the data.

➤ Interfaces also with our reconciliation auditing of every precinct.

Image Capture

STEP TWO: SCANNING

**ELECTION NIGHT STAFF
SCAN IN THE SIGNATURE
ROSTERS WHILE THE
PROVISIONAL FORMS ARE
PREPPED FOR SCANNING:**

★ ➤ Signature Rosters contain the voter's ID barcode and it updates their voting history.

★ ➤ By doing this we can ensure that in the processing of provisionals that voters are not allowed to vote twice.

SIGNATURE ROSTER

➤ We also modified the signature field in the roster to remind boardworkers that early voters at the polls have to vote a provisional ballot.

STEP THREE: PROCESSING

PROVISIONAL PROCESSING

- After scanning, the images are retained in batches by precinct number and staff process them electronically.
- Here staff process the provisionals without the handling and transportation of the paper records.

General Information

Determine why the voter had to vote a Provisional Ballot and verify the voter was eligible to vote in the election.

- Voter must be at least 18 years of age on or before the date of the election.
- When verifying provisional ballots, the voter needs to be registered within the appropriate district boundaries.
- Voter must vote at the polling place where they currently reside.
- Voter must be registered on or before the registration cut-off date for each election. (29 days)

PROVISIONAL PROCESSING

Provisional Ballot Error **RED** Exclamation Marks

Every voter is checked by the program by different parameters.

Possible errors will be marked by a **red "!"**. Using your mouse roll over the exclamation mark to view the error message. This can be used to help you to select the correct reason code for each ballot.

CPC: 1071 **!** CL: CH ELEM: 080 HS: 080
SUP: 001 Voter Voted at INCORRECT POLLING PLACE OR OUT OF DISTRICT!

DOR: 08/05/2008 **!** Voter ID: 3148054
QUEEN CREEK Voter REGISTERED AFTER CUT DATE!

09/10/1998 **!** DOR: 08/05/2008
800 AGE Requirement not met!

EV: GS **!**
GOOD SIGNATURE

➤ The system checks to be sure the voter is eligible based on:

- Age
- Date of registration
- Polling place
- Party affiliation

➤ It also checks to see if they have already voted:

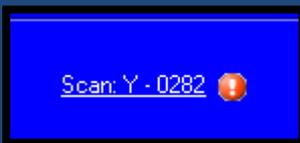

- Returned EV
- Voted at PP

Staff receive notifications in **red** with exclamation marks to bring the issue to their attention.

Because we also scan in the Signature Rosters used at the polls Election Day on election night, the system can pull the captured image of the voter's signature to be sure it is the same person (and that someone didn't sign in the wrong place).

IMAGE CAPTURE

- With the easy access to the image staff can quickly discern if a voter actually signed or if the barcode history update was triggered in error.
- This is also caught in the auditing process.

VOTER HAS MOVED

- The system interfaces with GIS to be sure the voter is in the correct district

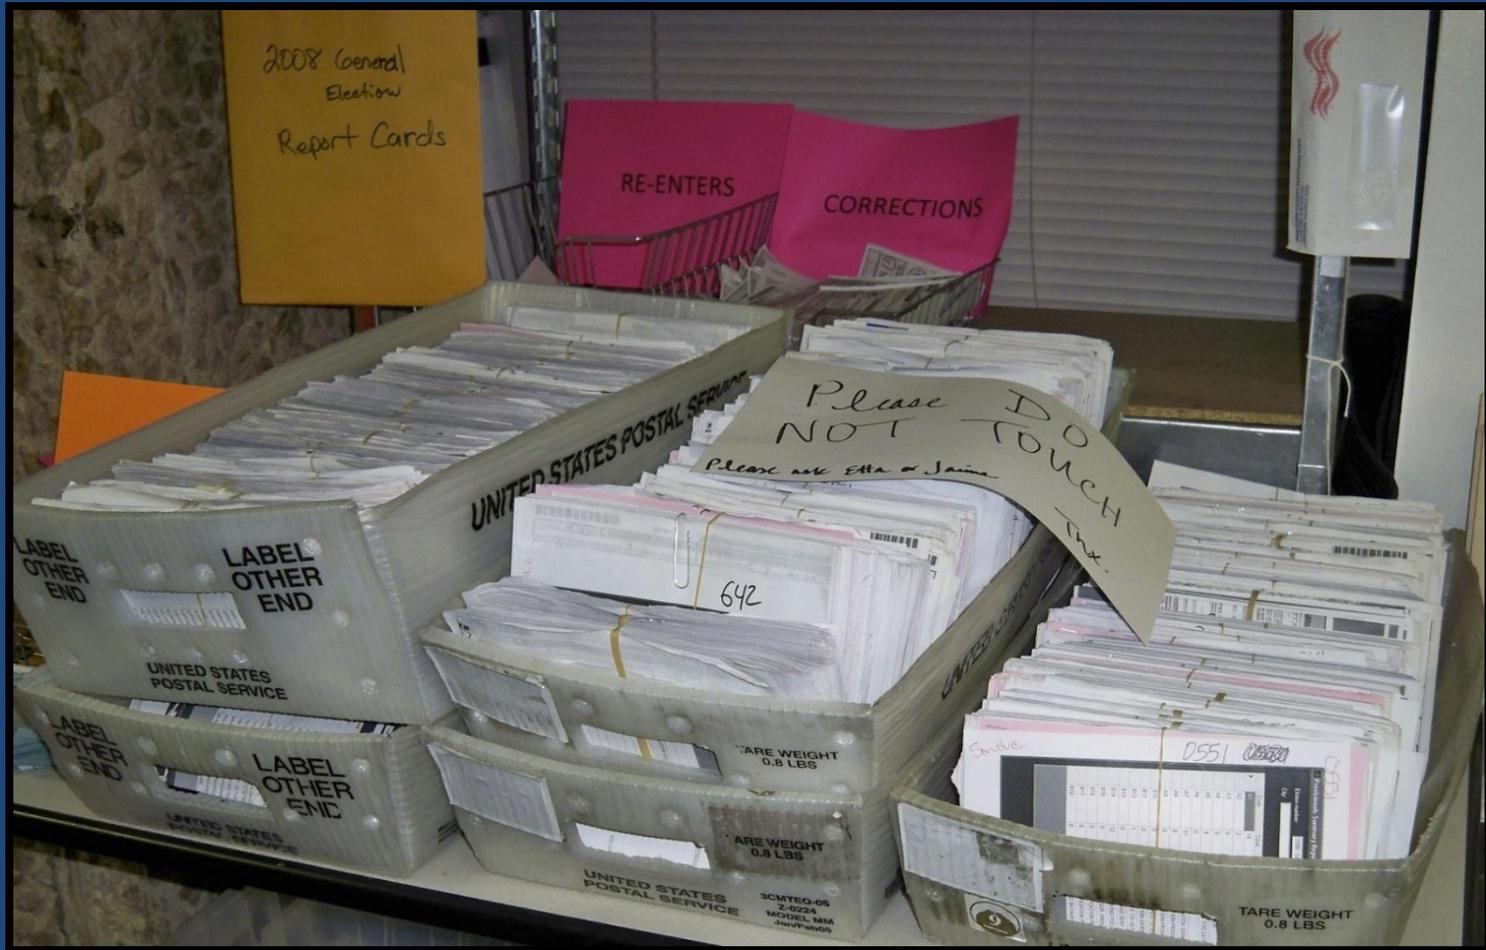

New Residence Ballot

Source	VoterID	Status	Max/Min	ActionDate	PrnCt	Last Name	First Name	Middle Name	Name Suffix	DOB	AddrType	Home	Home Suffix	SDir	STName	STType
QUALVOTR	1	A	011	0/24/2010	001	J	A			4/15/1966	R	915	N	MARY	ST	
VOTER	1	A	011	0/24/2010	0	J	A			4/15/1966	R	915	N	MARY	ST	

- If the voter is registered at an address that is different than the address given on the Provisional Ballot form in box A.
- The new address needs to be auto coded to determine if the address is valid and is within the district boundaries.
- When the Change of Name button is selected, the background color will change.
- To make an address change click on the “Change Add” button enter the complete NEW address and click the “AUTO CODE” button. The background color will change.
- If the address cannot be auto coded click on the skip button, print the form and place in the designated tray.
- Check the SCAN field. If this field indicates YES followed by a CPC/precinct number and a **Red** exclamation point the voter signed a signature roster in that CPC/precinct that’s listed, double-click on the “SCAN LINK” and compare the signatures. If the same person signed in two different precincts, print the signature roster pages, the Provisional Ballot form and notify the supervisor in charge.

NO MORE RE-KEYING!!

PROVISIONAL PROCESSING

➤ The voter's signature is verified on every provisional form with the image clip which is automatically pulled:

Verifying the voter's signature on the Provisional Ballot Slip

The image shows a sample of a Provisional Ballot Slip form. The form is titled "PROVISIONAL BALLOT / BOLETA PROVISIONAL" and includes a barcode and the form number "AFF# 8-10000001". It is divided into several sections: "CURRENT INFORMATION" (BOX A / CAJA A), "FORMER INFORMATION" (BOX B / CAJA B), and "FOR OFFICE USE ONLY" (BOX C / CAJA C). The "FOR OFFICE USE ONLY" section contains a line for the voter's signature, which is highlighted with a red box. A red arrow points to the signature line, and a red box is drawn around the signature area. The form also includes fields for voter identification, current and former residence addresses, and election official information.

- You must verify the voter's signature on each of the Provisional Ballot slips.
- If the voter's signature is missing, check the "Election Official" line, the voter may have signed on that line by mistake.
- **If the voter's signature is missing on the Provisional Ballot Slip, this ballot will not count and should be coded accordingly.**
- If the signature does not match the current record check the previous registration forms and if the signature's still do not match, this ballot will not count and should be coded accordingly.

DISPOSITION

➤ The system allows for the employee to enter in the disposition of the voters

ballot:

● Does it count, or not?

● & Why?

➤ Because the form is barcoded with the affidavit number this is immediately available to the voter via our online lookup tool or if they call in to our call center.

PROVISIONAL PROCESSING

- Not everyone loves provisionals as much as Flora!
- (But we all love the enhancements.)

Notable Counties - Yes, Maricopa County is Back Again

Arizona

May 10, 2012 | [Election Initiatives](#)

[Return to Election Data Dispatches.](#)

Once again the elections office in Maricopa County, Arizona has provided detailed data about its elections process, this time for the [February 28 presidential primary](#).

In the past we have looked at [provisional ballots and voter ID](#) as well as [online voter registration](#) in Maricopa County. This time around we focus on the new system the county implemented to process provisional ballots.

Previously, the thousands of provisional ballots the county received during major elections—more than 12,000 in February—were processed by hand. For this most recent election, a new electronic system developed by the office's IT staff was used, scanning each ballot into a computer for processing. The system checks a number of factors—registration status, age, and polling place location, for example—and flags any ballots that raise questions of eligibility.

The system also automatically updates a voter's registration record if there is a change in the residence address, mailing address, or name. This past election, the information of more than 1,700 voters was updated, equating to approximately 14 percent of provisional ballots cast.

County officials estimate that automating this process will save the county at least \$15,000 during the fall election cycle.

Presidential Preference Review
Pew Center on the States, 2012

THE NUMBERS

➤ **14%** of our Provisionals were automatically updated in our PPE.

➤ Department saves roughly **\$.75** for each one updated using the new system.

➤ If we see another 100,000+ this fall this will save an estimated **\$15,000***.

➤ * This DOESN'T include the cost/time savings of staff being able to access work product at their desks.

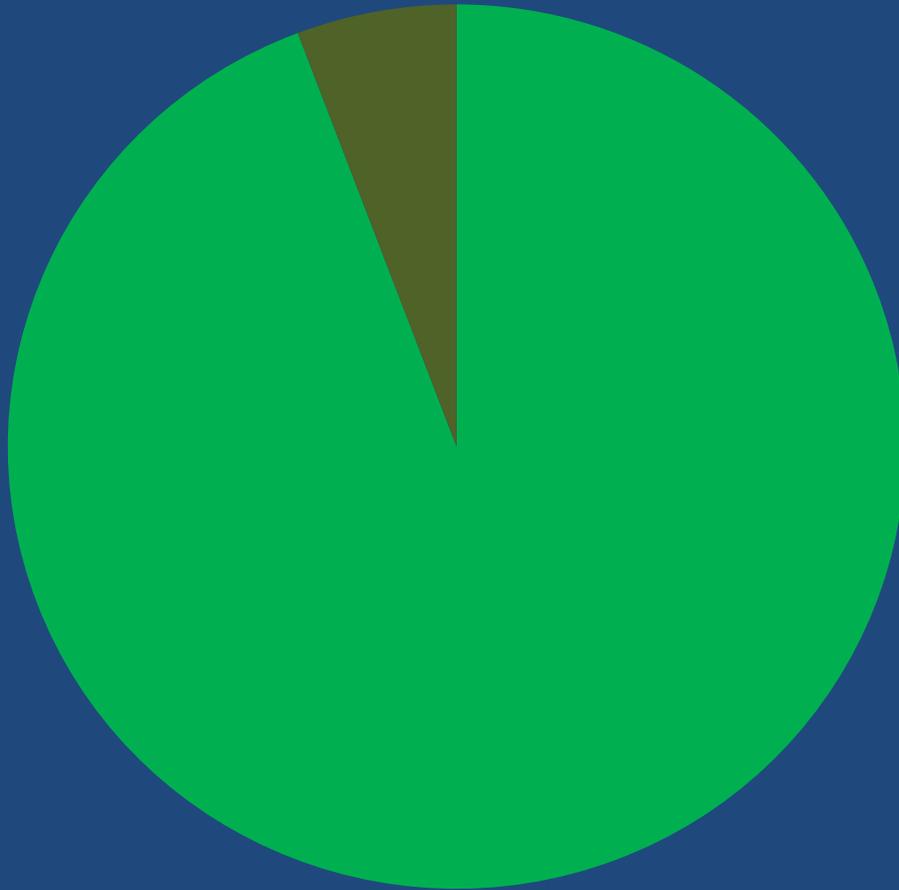

STEP FOUR: PROCESSING OF BALLOTS

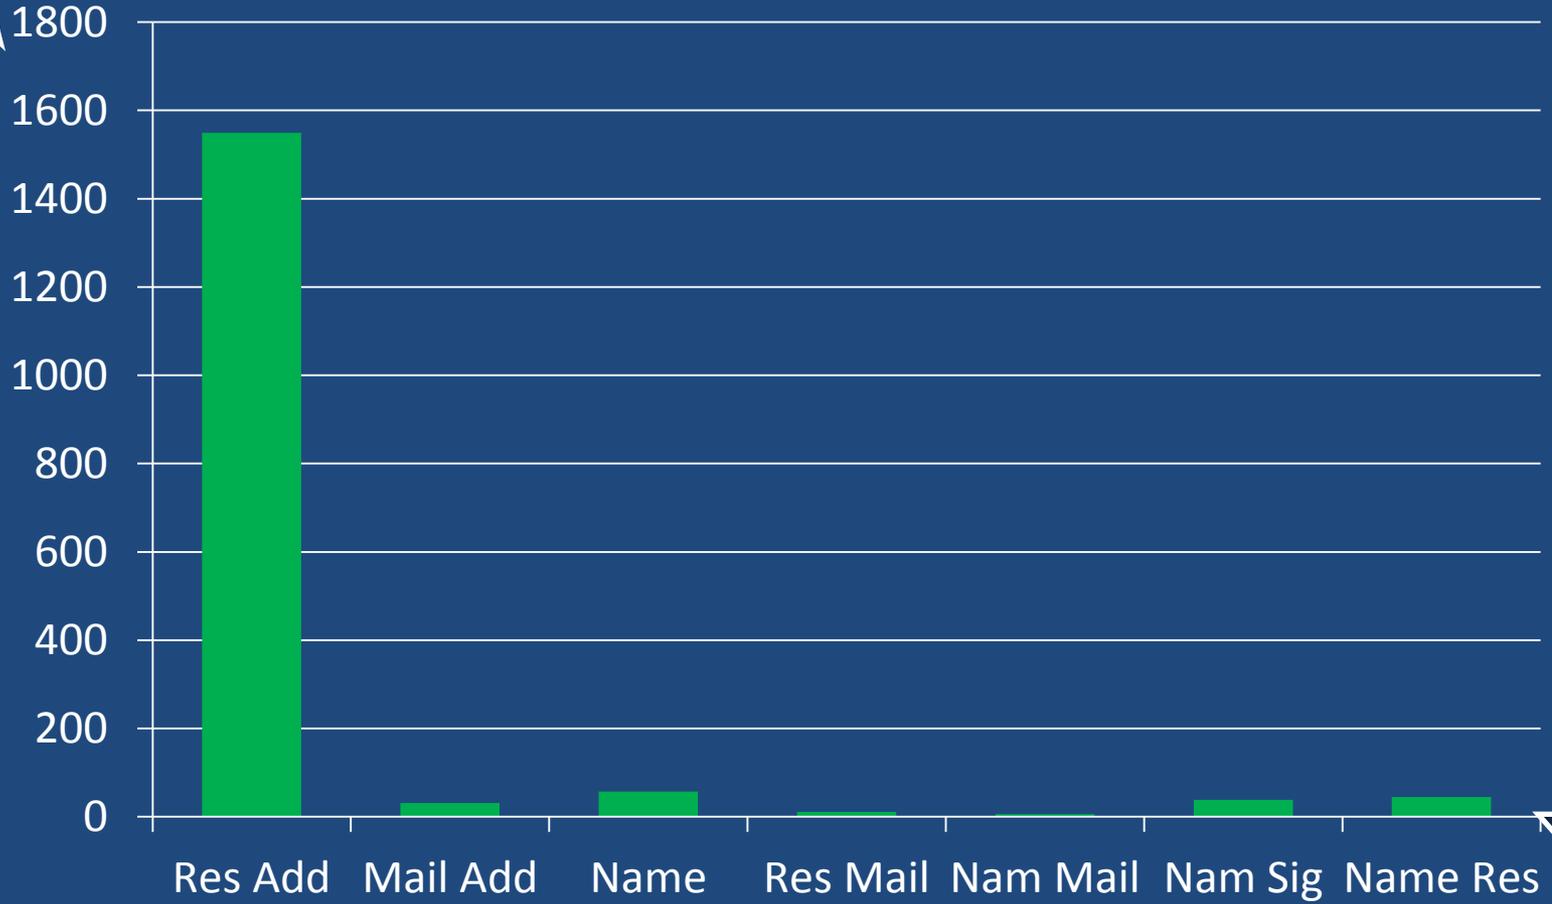

UPDATES IN PPE

■ Single Update

■ Multiple Update

UPDATES IN PPE

BALLOT DISPOSITION

➤ The physical aspect of ballot processing has not changed that much with the new system with one exception.

➤ Because of the automation the reports can now be generated as precincts are done, staff can be shifted to begin this processing earlier.

REPORTS ARE GENERATED FOR EACH PRECINCT/CONSOLIDATION:

RUNNERS MATCH THE REPORTS WITH THE APPLICABLE BALLOT BATCHES AND DELIVER THEM TO THE BOARD FOR PROCESSING:

★
★

**BI-PARTISAN BOARDS
MATCH THE REPORT TO
THE ACTUAL ENVELOPES
CONTAINING THE BALLOT
TO DETERMINE WHICH
ONES ARE TO BE COUNTED:**

**THE ENVELOPES ARE OPENED
AND THE BALLOTS PLACED IN A
TRAY TO GO TO THE TABULATION
CENTER.**

**STEP FIVE:
NEW AUDITING
INTERFACE**

ADDITIONAL BENEFITS

- The new system also has auditing implications which help in identifying when there are anomalies or discrepancies.
- In AZ we do a reconciliation audit of all precincts prior to canvass.

AUDITING

➤ Our boardworkers (pollworkers) complete a Precinct Ballot Report at the polls on Election Day complete with the number of names on their provisional roster.
